

You Can Make a Difference!

Challenging Careers in the Natural Resources Conservation Service

Student Career Experience

Each year, Minnesota NRCS hires students under its Student Career Experience Program. If you are a college or graduate school student, you may qualify.

You can alternate periods of work and study, or work on a part-time schedule while attending school. You'll work for, and learn from, NRCS professionals in your field of study.

Participation in this program could lead to a job offer and a full-time career when you graduate.
