

Grazing Management Enhancements

Natural Resources Conservation Service
United States Department of Agriculture

Minnesota, 2006

Reduce travel distance to watering facilities to uniformly distribute grazing pressures and avoid erosion by prevention of the formation of trails.

Definition

Watering facilities and water access points are located within 800 feet of at least 80% of the pasture in the grazing system.

Purpose

The purpose of this enhancement is to encourage uniform distribution of grazing pressures and avoid erosion by prevention of the formation of trails.

Where Used

The enhancement may be used in all prescribed grazing systems.

Operation and Maintenance

Watering facilities and water access points will be located so that at least 80% of the pasture will be within 800 feet in distance to a watering facility.

Payment Rate

The payment rate is an annual flat rate payment.

Documentation Required

A map outlining the pasture area and indicating the locations of water access points, watering facilities and pipelines.

I certify that, to the best of my knowledge, the above information is correct and that, if requested, I will provide additional documentation to support the above information.
