

# Environmental Quality Incentives Program

## 2012 EQIP Signup

Minnesota Supplement for:  
Practice Standard 350 – Sediment Basin

### **Supplemental Criteria**

1. **Consult General Provision 15 for Ag Waste System payment cap information.**
2. The feedlot slotted wall item may be combined with the “Concrete Scrape Alley” item under Waste Transfer where needed to provide a concrete bottom for maintenance.
3. The square foot area measured for controlled outlet sediment basins is the area of the concrete bottom.
4. The Silt Fence is for temporary sediment control on construction sites associated with a conservation practice located on the edge of cropland or on non-cropland. This practice is not to be used across concentrated flow areas such as waterways.
