Minnesota Supplement for:
Practice Standard 587 – Structure for Water Control

Supplemental Criteria

1. A Drainage Water Management plan must be developed, submitted and approved prior to practice implementation.
2. Structure for Water Control- drainage water management system is eligible for:
 - a. **a new tile drainage system** designed (on the contour) for drainage water management. *There is **no** financial assistance for the new tile. Payment is for the Structure for Water Control only.*
 - b. **an existing drainage system** retrofitted for drainage water management. *Payment is for the Structure(s) for Water Control only.*
3. Payment rate includes the water control structure, fittings, piping and anti-seep diaphragms, and couplings needed to attach the control structure to the existing tile.
4. Technical assistance for Structure for Water Control- drainage water management system will be provided by designers/installers certified by the Agricultural Drainage Management Coalition.
5. In the event that a three chamber water control structure is used in conjunction with a denitrifying bioreactor it will be considered and counted as two structures.
