

## **CONSERVATION RESERVE NOTE #100**

**February 14, 2000**

This note updates our Conservation Reserve Notes and Index. Current CRP notes are 72, 74, 75, 78, 79, 81, 82, 83, 84, 85, and 88-100. All other notes not included on this list are cancelled. The seeding mixtures and T&E lists for previous sign up periods that were transmitted with some of the cancelled notes are to be kept as references until contracts from those sign up periods have expired.

The Operation and Maintenance forms that were sent with notes #73 and 80 are still current and will be available on the Minnesota NRCS web site.

An updated index will be sent separately as an electronic word file to all offices. This index can then be updated locally as new notes are added. The index will also be available on the web site.
